Shower enclosure collection

**Roca**

## Shower enclosure collection

A wide array of models for an enclosure with a minimalistic design adaptable to any space, with added functionalities that guarantee enhanced durability.

### DUAL INSTALLATION

It offers two types of installation: with drill or by means of adhesive to avoid drilling holes in the wall.

### EASY TO INSTALL

Its assembly kit includes all elements of the enclosure, perfectly organized in the same order to be followed for a quick and easy installation.

### INCREASED WATERTIGHTNESS

Its design, featuring a lower profile, provides the enclosure with a high level of watertightness, avoiding water leaks.

### REVERSIBLE

Its design, featuring a lower profile, provides the enclosure with a high level of watertightness, avoiding water leaks.

### DOOR RELEASE SYSTEM

It features a mechanism that releases the doors' lower fastenings to facilitate cleaning between glasses.

### GREATER FIRMNESS

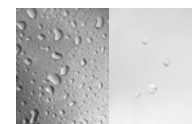

The upper profile, with increased thickness, provides strength and stability to the enclosure, making it possible to support different doors, regardless of their weight.

### ADJUSTABLE

Its compact compensation system allows the adjustment of the enclosure to the existing conditions, without having to increase the width of the profile.

### EASY CLEANING

Its exclusive Maxiclean® treatment repels water and prevents lime and dirt from building up on the glass.

MAXICLEAN

±6 mm

### ENHANCED SAFETY

The entire collection features 6 mm tempered glass (in compliance with the European norm EN:14428), which, in case of breakage, disintegrates into small fragments with rounded edges, thus guaranteeing maximum safety in the event of an accident.

## CATALOGUE

## Maxiclean® treatment

**Maxiclean®** is an invisible treatment especially designed to modify the molecular structure of the surface of the enclosure's inner glass, which makes it possible to repel water and prevent the persistent buildup of lime, salts and dirt.

A glass with **Maxiclean®** keeps the same qualities of transparency and brilliance as any other glass, making cleaning easier and ensuring its perfect condition over time.

### WITHOUT MAXICLEAN

Lime, salts and dirt build up on the inner surface of the glass leading to the adherence of a multitude of drops.

### WITH MAXICLEAN

The inner glass repels water, thus avoiding the persistent buildup of lime, salts and dirt.
